2. How to read this measure

This work-control measure separates placement, start authority, implementation, validation, approval, and filesystem finalization. No one step silently implies another. The observation is evidence-based and is not the complete real project.

3. Current atomic state

- Canonical value: Awaiting Approval
- Plain-language value: Awaiting Approval: MAINTENANCE 001
- State class: user-action
- Blocks the current action: no
- Next owner: USER
- Exact next action: Approve MAINTENANCE 001 or request correction
- User input still required: Current evidence ties implementation and fresh required validation to one controlling task.
- Codex handles: bounded implementation, validation, document repair, and lifecycle mechanics supported by repository evidence.

4. Why this state was assigned

The canonical Project System, lifecycle, Project Dynamics, target, responsibility, evidence, and activity resolvers supplied this value. It is not a direct blocker; other debt remains secondary.

Missing or unresolved

- None identified by the bounded path check.

6. Current systems relationship

- Observed state: Awaiting Approval: MAINTENANCE 001
- Target: Approve or request correction for MAINTENANCE 001
- Current gap: Safe copied Codex command: missing
- First safe transition: Review MAINTENANCE 001
- Preservation boundary: project identity, source, content, data, assets, outputs, approved history, and unrelated governance remain protected.
- Confidence: High; Current filesystem evidence and the selected workflow adapter strongly agree.

7. Measure-specific history

- This is the first adopted document observation for this measure.
- Controlling work: MAINTENANCE 001
- Current owner: USER
- Transition records: ../../history/transitions/

9. Known limitations and next review trigger

Refresh this document after a material canonical observation change, approval/correction/finalization event, validation result, target decision, lifecycle repair, or document-contract repair. Regeneration alone does not change project state or meaningful activity.
