4. Transition chronology

Immutable transition records under history/transitions record state-changing actions observed through governed operations. Clipboard copies, scans without material change, and PDF regeneration do not create transitions.

5. Approval and finalization chronology

Approval is a user decision. Completed is shown only after the authoritative filesystem placement is reobserved. The current approval/finalization state is Ready for Review.

6. Migration and compliance milestones

Current Project System alignment is Compatible Legacy. Generated state documents are presentation and evidence-delivery artifacts, not compliance authority.
