Delivery state current

2. How to read this measure

This work-control measure separates placement, start authority, implementation, validation, approval, and filesystem finalization. No one step silently implies another. The observation is evidence-based and is not the complete real project.

3. Current atomic state

- Canonical value: Archived
- Plain-language value: Archived
- State class: neutral
- Blocks the current action: no
- Next owner: NO_ACTION
- Exact next action: Nothing is required now
- User input still required: No routine input; explicit approval and special authority remain separate.
- Codex handles: bounded implementation, validation, document repair, and lifecycle mechanics supported by repository evidence.

4. Why this state was assigned

The canonical Project System, lifecycle, Project Dynamics, target, responsibility, evidence, and activity resolvers supplied this value. It is not a direct blocker; other debt remains secondary.

Missing or unresolved

- None identified by the bounded path check.

6. Current systems relationship

- Observed state: Archived
- Target: Level 3
- Current gap: Maintenance lifecycle: partial
- First safe transition: Nothing is required now
- Preservation boundary: project identity, source, content, data, assets, outputs, approved history, and unrelated governance remain protected.
- Confidence: High; Current filesystem evidence and the selected workflow adapter strongly agree.

7. Measure-specific history

- Previous value: Awaiting Approval
- Current value: Archived
- Prior material change: 2026-08-06T01:46:03.400Z
- Controlling work: MAINTENANCE 001
- Current owner: NO_ACTION
- Transition records: ../../history/transitions/

8. Evidence references

- Filesystem-authoritative lifecycle resolver - canonical evidence reference for observation df25354cc5ef54a3b0da07b33b8a9c7f0c5ebd7abcd9fac8bfd843d5cf09ba6

9. Known limitations and next review trigger

Refresh this document after a material canonical observation change, approval/correction/finalization event, validation result, target decision, lifecycle repair, or document-contract repair. Regeneration alone does not change project state or meaningful activity.
