2. How to read this measure

This portfolio measure explains attention, alignment, freshness, confidence, or meaningful activity without reducing the project to a scalar health score. The observation is evidence-based and is not the complete real project.

3. Current atomic state

- Canonical value: High
- Plain-language value: Current filesystem evidence and the selected workflow adapter strongly agree.
- State class: satisfied
- Blocks the current action: no
- Next owner: NO_ACTION
- Exact next action: Nothing is required now
- User input still required: No routine input; explicit approval and special authority remain separate.
- Codex handles: bounded implementation, validation, document repair, and lifecycle mechanics supported by repository evidence.

4. Why this state was assigned

The canonical Project System, lifecycle, Project Dynamics, target, responsibility, evidence, and activity resolvers supplied this value. It is not a direct blocker; other debt remains secondary.

Missing or unresolved

- None identified by the bounded path check.

6. Current systems relationship

- Observed state: Current filesystem evidence and the selected workflow adapter strongly agree.
- Target: Level 3
- Current gap: Maintenance lifecycle: partial
- First safe transition: Nothing is required now
- Preservation boundary: project identity, source, content, data, assets, outputs, approved history, and unrelated governance remain protected.
- Confidence: High; Current filesystem evidence and the selected workflow adapter strongly agree.

7. Measure-specific history

- Previous value: High
- Current value: Current filesystem evidence and the selected workflow adapter strongly agree.
- Prior material change: 2026-08-06T01:46:03.400Z
- Controlling work: MAINTENANCE 001
- Current owner: NO_ACTION
- Transition records: ../../history/transitions/

8. Evidence references

9. Known limitations and next review trigger

Refresh this document after a material canonical observation change, approval/correction/finalization event, validation result, target decision, lifecycle repair, or document-contract repair. Regeneration alone does not change project state or meaningful activity.
